| Right, debug.log is what I need.

Attached in latest version.

| You're using v0.1.3 right?

Yes.

| What operating system are you using?

Windows XP Professional Version 2002 Service Pack 3

| I haven't tested Vista yet but I'm getting a copy tomorrow.  
Several people have been running on XP since I released v0.1.3  
without problems.

| 0x000bd598 isn't a valid address. If it printed another address  
in the crash dialog, that would be useful.

I've saved the Event Viewer data using words instead of bytes, in case  
that's any more useful:

Event Type: Error  
Event Source: Application Error  
Event Category: None  
Event ID: 1000  
Date: 26/01/2009  
Time: 04:51:09  
User: N/A  
Computer: HP91914945127  
Description:  
Faulting application bitcoin.exe, version 0.0.0.0, faulting module  
bitcoin.exe, version 0.0.0.0, fault address 0x000bd598.

For more information, see Help and Support Center at  
<http://go.microsoft.com/fwlink/events.asp>.

Data:  
0000: 6c707041 74616369 206e6f69 6c696146  
0010: 20657275 74696220 6e696f63 6578652e  
0020: 302e3020 302e302e 206e6920 63746962  
0030: 2e6e696f 20657865 2e302e30 20302e30  
0040: 6f207461 65736666 30302074 35646230  
0050: 0a0d3839

I notice this gives the same fault address, though. I don't know where

to find the crash dialog you mention (this is technically deep water by my modest standards - I'm just a humble lawyer).

I had another crash in the early hours of this morning: from Event Viewer:

Event Type: Error  
Event Source: Application Error  
Event Category: None  
Event ID: 1000  
Date: 26/01/2009  
Time: 04:51:09  
User: N/A  
Computer: HP91914945127

Would it be useful to send an updated copy of debug.log?

I have restarted Bitcoin, and it is running normally.

Regards,

Nicholas
