Subject: Bitcoin v0.1.5 released
From: Nicholas Bohm <nbohm@ernest.net>
Date: 18/02/2009, 14:55
To: bitcoin-list@lists.sourceforge.net

Version 0.1.5 seems to be running trouble free. I have a list of 201
transactions, I've accumulated about bc8550. Transfers in and out seem
to work fine (after a bit of head-scratching to understand the labelling
of incoming transactions).

What's next?
